Junior Tech Creators: Intro to Coding: $175 for 8 Sessions Grades K-2

Wednesday at 6-7PM Wednesdays December 4, 2024- February 5, 2025

Step into the world of coding and become a Junior Tech Creator! In this fun and interactive class, you'll explore the basics of programming through exciting games, creative challenges, and hands-on activities. Using kid-friendly coding platforms like Scratch and Blockly, you'll design your own animated stories, build simple video games, and even create digital art—all while learning problem-solving and thinking like a real coder. Whether you're new to coding or ready to explore, get ready to turn your ideas into digital adventures!

Artificial Intelligence Coding Club $125 (6 Sessions) Grades 2-5

Thursdays at 7-8PM December 5, 2024- January 23, 2025

This class designed to introduce kids in to the fascinating world of Artificial Intelligence (AI)! Through hands-on activities, interactive lessons, and coding challenges, students will discover how AI is transforming our world. From exploring fun AI tools like chatbots and image generators to learning the basics of machine learning and coding AI projects, kids will gain an understanding of how AI works and build their own creative AI-powered programs. With plenty of free resources, engaging projects, and opportunities to explore the latest AI technologies, this course encourages young minds to think critically, problem-solve, and develop future-ready tech skills.

Code Creators: Build Games & Web Projects with Python & JavaScript $175 (8 Sessions) Grades 5-12

Wednesday at 7-8PM Wednesdays December 4, 2024- February 5, 2025

Get ready to dive into the exciting world of coding with JavaScript and Python, two of the most popular programming languages used by developers today! In this fun and interactive class, you'll learn how to create your very own games, animated stories, and interactive websites, while mastering the basics of coding logic and problem-solving. By the end, you'll build projects like a choose-your-own-adventure game, a custom quiz, and even a mini-arcade game, showing off your skills as a budding programmer!
